DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claim 18 is rejected as being directed to non-statutory subject matter because dependent claim 18, recites in the preamble "A computer program ". Claim limitation reciting a computer program is non-statutory the claim may be amended to include explicit limitation of "A non-transitory computer readable medium containing computer program to implement a method" such as computer memory, RAM, SRAM, DRAM etc. The specification does not define any computer readable medium. Further specification should be amended to define explicitly non-transitory computer readable medium such as memory, RAM, SRAM, DRAM etc and avoid transitory computer readable medium such as wire/wireless transmission, carrier wave or propagating signal. Examiner would suggest make claim 18 independent claim which should include all limitations of claim 17.

3. Claim 19 is rejected as being directed non-statutory subject matter because dependent claim 19, recites in the preamble "A record carrier comprising a computer program". Claim limitation reciting a record carrier is non-statutory because it covers transitory computer readable medium such as wire/ wireless transmission, carrier wave or distributed network. In order to avoid rejection under 35 USC 101, the claim may be amended to include explicit limitation of "A non-transitory computer readable medium" such as computer memory, RAM, SRAM, DRAM etc. Further specification should be amended to define explicitly non-transitory computer readable medium such as memory, RAM, SRAM, DRAM etc and avoid transitory computer readable medium such as wire/wireless transmission, carrier wave or propagating signal. Examiner suggest Applicant to cancel claim 19 because claims 17 should include a non-transitory computer readable medium containing a computer program/software.

Allowable Subject Matter

4. Claims 1-17 are allowable over prior art of record. Claims 18-19 would also be allowable if Applicant overcome rejection under 35 USC 101.

The following is the reasons for allowance of claims 1-17. The present invention is a method and an apparatus for content analysis. Independent claims 1 and 17 identify distinct and unique limitations " extracting first video coding data from the first video signal, the first video coding data being in accordance with the first video encoding format, converting the first video coding data into second video coding data being in accordance with a second video encoding format and performing a content analysis in

response to the second video coding data". The prior art of record disclose video content analysis, however fail to anticipate or render the above limitation obvious singularly or in combination.

Communication

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sherali Ishrat whose telephone number is 571-272-7398. The examiner can normally be reached on 8:00 AM - 4:30PM.
